Program Overview

Rx4NJ, A Partnership for Prescription Assistance

Who We Are

Rx4NJ brings together America's pharmaceutical companies, doctors, patient advocacy organizations and civic groups to help low-income, uninsured patients get free or nearly free brand-name medicines. Our mission is to increase awareness of and enrollment in existing patient assistance programs for those who may be eligible. Rx4NJ offers a single point of access to more than 300 public and private patient assistance programs, including more than 150 programs offered by pharmaceutical companies.

What We Offer

Help for Those in Need

Many people have difficulty affording health care, including prescription medicines. A number of patient assistance programs provide help to patients who lack prescription drug coverage and earn less than 200% of the federal poverty level (approximately \$19,000 for an individual or \$31,000 for a family of three).*

More than 27 million people in the United States make less than 200% of the federal poverty level and are uninsured.

Access to Free or Nearly Free Medicines for Those Who Qualify

Patients will be directed to the public or private programs most likely to meet their needs. Rx4NJ helps low-income, uninsured patients:

- Enroll in more than 150 company patient assistance programs
- Access more than 1,400 medicines for free or at a low cost
- Learn how to contact government programs for which they may qualify, such as PAAD, Senior Gold, Medicaid, Medicare, or the State Children's Health Insurance Program

Easy Enrollment

Finding the right program can be complicated. That's why Rx4NJ is making the process much easier for patients by offering:

- A single toll-free number (**1-888-RXFORNJ**) and website (www.rx4nj.org) for access to information about all available programs
- Trained specialists to help identify programs and help fill out forms

* Qualifications vary by programs.
